Profile

Versatile, high-agency Business Development Lead and Founder with a cross-functional track record spanning market acquisition, software execution, and operational scaling. Highly adept at navigating the 0-to-1 lifecycle: building automated systems infrastructure, managing distributed teams, and launching strategic GTM loops. A cross-disciplinary builder who aligns technical delivery with high-growth startup metrics.

Honors & Global Recognition

Columbia University

New York, USA

"Start Me Up" Venture Program Bootcamp Alum & Finalist

2025

- Selected to pitch accelerated venture architecture, go-to-market strategies, and product scaling frameworks to a panel of US-based investors and industry operators.

Core Competencies & Systems Playbook

- Sales Execution & Deal Closing:** B2B Enterprise Sales, High-Value Objection Handling, Deal Structuring, Advanced Discovery Loops, Enterprise Qualification (BANT / MEDDPICC), Value Proposition Mapping, Contract Negotiation.
- Operations & GTM Strategy:** Cross-Functional Team Leadership, International Partnerships, Pipeline Velocity Optimization, Product Validation, Value Chain Engineering, Stakeholder Management.
- Automation & Technical Logic:** Python Automation Scripting, Custom API Integration Layers, FastAPI, SQL, Workflow Engineering (n8n, Apollo.io), LLM Orchestration, Applied Computer Vision Systems.
- Tooling & Data Frameworks:** HubSpot CRM, Salesforce Systems, Lead Scoring Architectures, System Mapping, Lifecycle Metrics, Operations Research, Systems Thinking.

Professional Experience

GoPerch

Remote (US/Europe)

General Manager (Operations & Growth)

Mar 2025 – Present

Client Executive & Systems Engineer

Sep 2024 – Feb 2025

- Promoted to General Manager within 6 months of joining to direct a 20-person cross-functional engineering, sales, and administrative support squad, driving end-to-end operational alignment.
- Led the end-to-end go-to-market and partner strategy to source, structure, and secure critical US-based B2B agreements, routinely navigating complex buyer objections to expand global business presence.
- Orchestrated the implementation details and rollout for a high-concurrency enterprise ERP framework across 15+ complex retail touchpoints, validating system metrics to drop operational overhead by 30%.
- Translated engineering milestones into clear, high-ticket business outcomes, successfully commercializing complex YOLOv8 edge computer vision pipelines for enterprise North American accounts.

Founder & Execution Operator

India / Remote (US)

Multiple Venture Portfolio (SaaS, AI, IoT, Business Services)

Jan 2024 – Present

- Built and capitalized multiple early-stage initiatives across diverse market verticals, transitioning theoretical concepts into active pilot loops, automated software workflows, and validated assets.
- Managed multi-threaded operational lifecycles: engineered high-volume outbound prospecting tools, conducted structured qualitative discovery campaigns, and negotiated vendor and client parameters.
- Programmed zero-dependency data-scraping workflows and cross-channel messaging systems via Apollo and internal APIs, boosting internal pipeline exploration velocity by 400%.

Portfolio Project Highlights:

- PurpleAsh / CoreOptima (AI Operations Engine):** Shipped an automated enterprise data-cleaning MVP that eliminated 70% of manual analytical friction for B2B adopters; ran iterative customer discovery campaigns that facilitated a strategic asset acquisition by GoPerch.

- **PeoplePro Consulting Services:** Deployed automated user-segmentation logic and internal data pipelines, driving an immediate 35% month-over-month growth spike in booked business development calls.
- **Fetch Smart Vending Solutions:** Spearheaded regulatory and expansion partnership negotiations with high-level university administrators to deploy connected, ad-monetized automated hardware networks.

Selected Operations & Product Initiatives

Codorra National Cyber & AI Hackathon

Bengaluru, India

Core Operations & Ecosystem Lead

Mar 2026 – June 2026

- Directing corporate outreach tracks, operational logistics, and multi-channel marketing infrastructure for a national-scale digital mobilization supporting a 4 Lakh INR funding pool.

LeadPilot AI — Automated Funnel Engine

System Validation

- Isolated critical lead-conversion drop-offs within transaction pipelines; engineered an AI voice assistant response protocol to trigger phone verifications within 60 seconds of client ingestion.
- Managed live pilot distributions with brokerage networks to analyze behavioral engagement metrics and response latency impacts.

Vortex AI — Workflow Orchestration Tool

Operational Frameworks

- Conducted user research interviews to track manual task fatigue; designed an observable Observe-Plan-Execute browser framework utilizing Llama 3.3 to automate web actions and maximize initial user retention.

Education & Core Systems Training

Manipal Institute of Technology (MIT)

Manipal, India

Bachelor of Technology (B.Tech.) in Industrial Engineering

2024 – 2028

- Focus areas: Systems Thinking, Operations Research, Analytical Optimization, Performance Metrics.
- Research Lead — RADONC: Mapping component precision thresholds, safety tolerances, and industrial design parameters for a therapeutic radiation oncology hardware arrangement.
